Experience

Application Developer Intern | IBM Canada

Sept 2019 - Aug 2020

- Designed and built full-stack web applications on IBM intranet site.
- Used Node.js Express server to query SQL database and serve front-end.
- Followed HCI practices to design great user experiences with Vue.js framework and the IBM w3ds design system.
- Collaborated with other developers for input on software requirements and standards.
- Successfully used Git and SVN to handle version control.

Grounds Maintenance/Landscaping | Two Sister's Vineyards, Maintenance by the Yard, Marynissen Estates

Summers of 2014 – 2019

- Developed great work ethic and sense of pride in work.
- Used teamwork to ensure jobs were done efficiently.
- Became comfortable in highly supervised environments as well as environments with minimal supervision.

Education

Western University
B.E.Sc Software Engineering
Sept 2016 - present
